

CORONAVIRUS UPDATE FOR JUNE

In a press conference on Wednesday, our Governors have stated we begin phase 2 of reopening starting Friday June 5th.

To address all of us at Western Pneumatics, Inc., we are still under the guidelines that we have been for several weeks, social distancing, sanitizing and cleaning, limit public access, hold trainings and meeting via phone and Zoom.

Under the phase 2 guidelines, business including medical and dental offices will open under strict guidelines, the general public will be able to frequent restaurants, business and parks. Social gathering sizes have increased as long as distancing can remain in effect.

It is my opinion that due to the recent protesting, large gatherings and not social distancing during these events we will see a great increase in illness in the next couple of weeks throughout our entire country. Therefore, it is so important to maintain our current practices here at WPI and at home.

A reminder, if you are sick, please stay home. If you are running a fever, contact your health care provider. Get tested if you have any inkling that you may have the virus. There are a lot more testing facilities and results are usually returned in 2-3 business days. Louisiana is suspending several testing sites the week of June 7 – 12 due to the tropical storm that is expected.

We are still very fortunate to not have a COVID-19 test come back positive. Let's keep it that way.

And again I need to state that we are very fortunate to be working in an essential business, that is busy, has work and is projecting more work every day. You are all amazing in demonstrating your dedication to your job by being here and performing your jobs while overcoming the challenges that this pandemic has brought upon us.

We are in this together, we are supporting each other, we are Western Pneumatics, Inc.

Thank You Everyone,

Earline
